

About The Project

The project is located in the heart of Maslak, a central business and investment hub. This architectural marvel boasts breathtaking 360-degree panoramic views encompassing the Bosphorus, three bridges, and the city skyline.

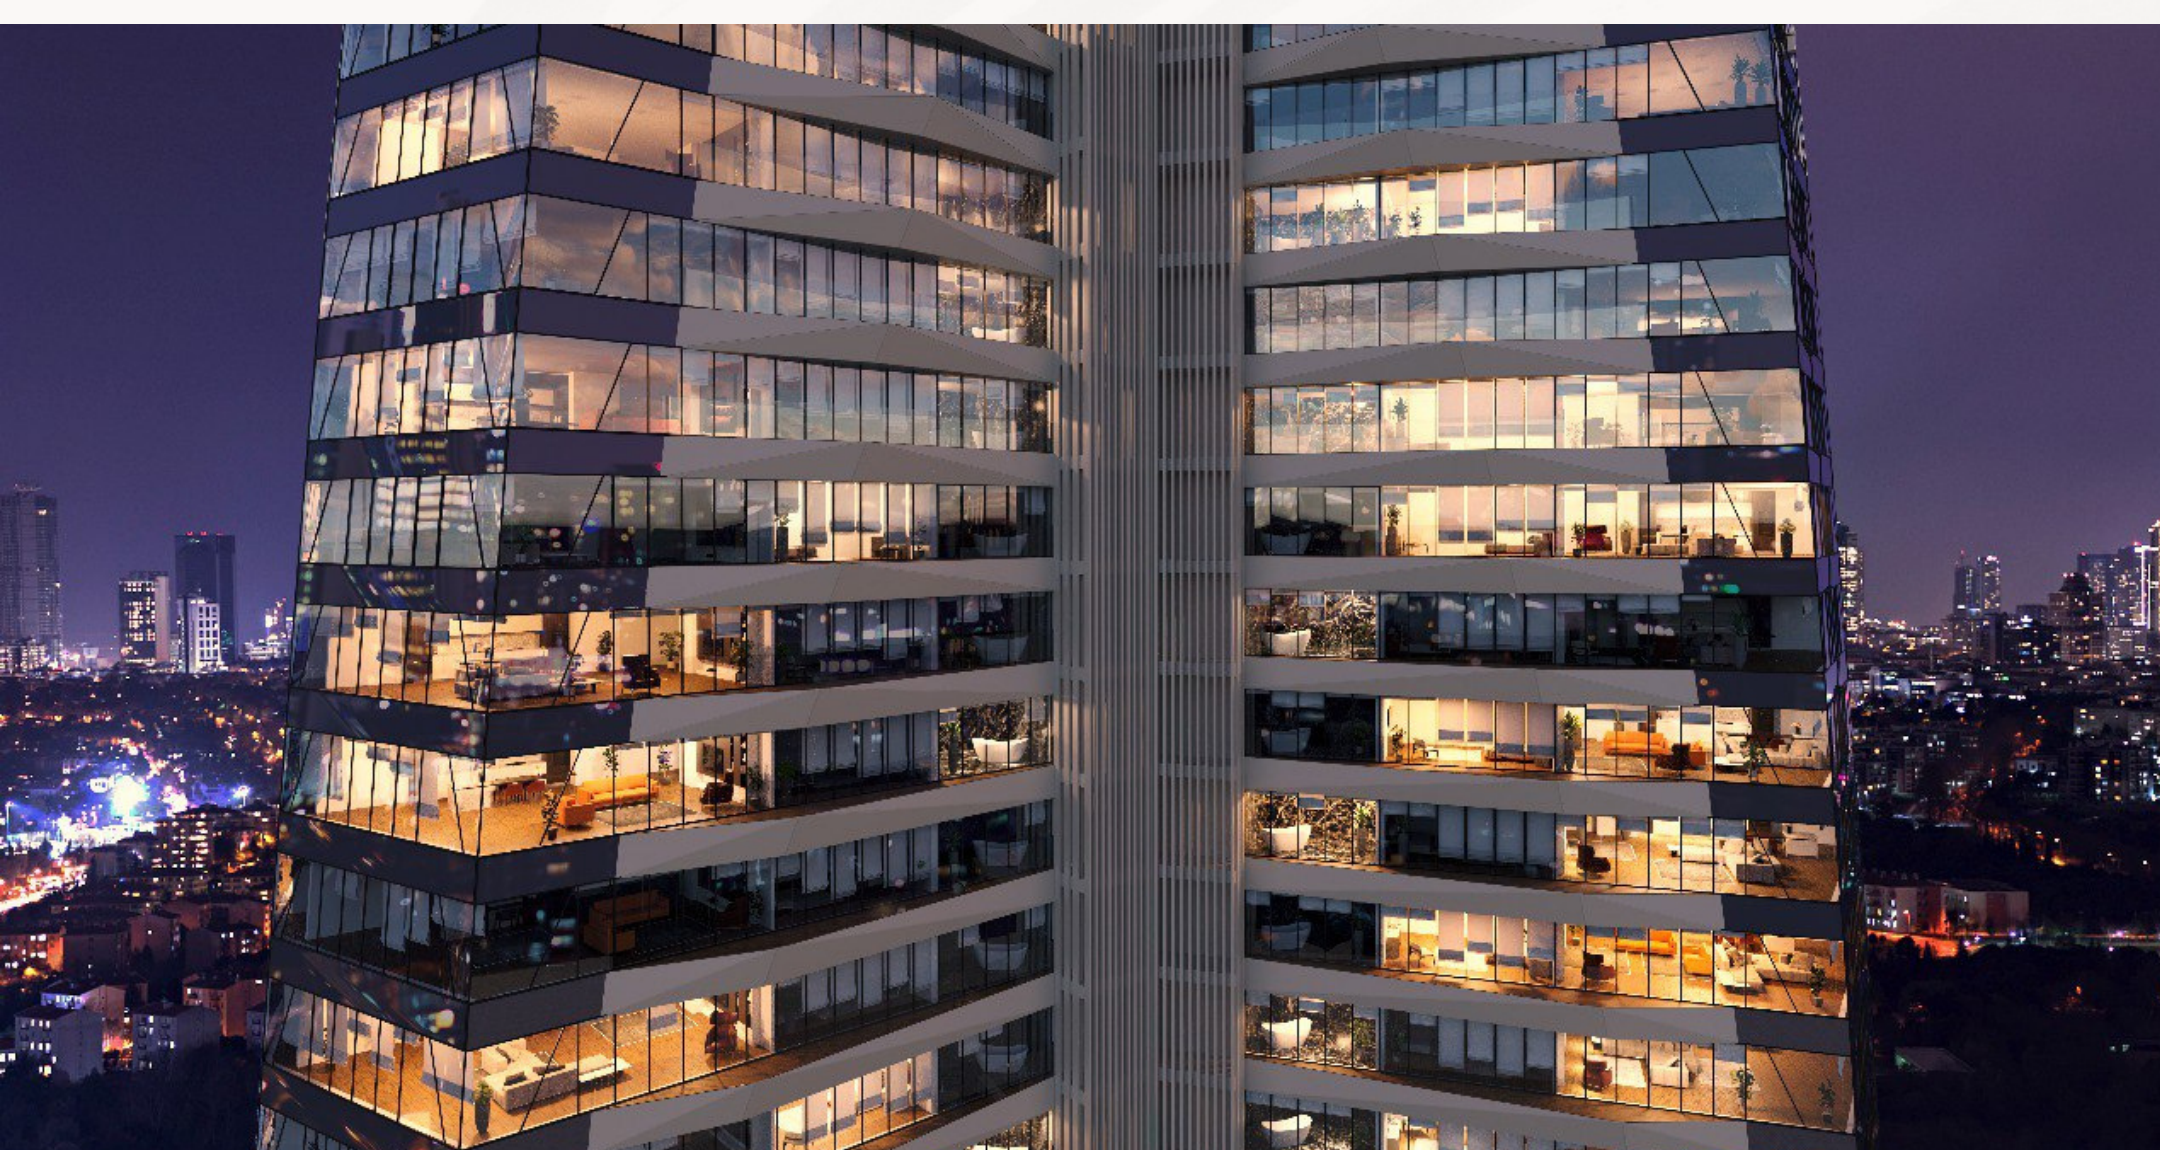

The project holds the title of the highest and most detailed composite structure, featuring innovative steel construction by Thornton Tomasetti, a world leader.

The project caters to various lifestyles, offering a range of housing units with independent entrances, exits, and activity areas.
